Full-time MBA, for the Global Citizens

Our MBA students

Our vision is to be Europe’s leading University-based business school, developing transformational ideas and people that shape how we do business. With our innovative learning culture, world-class teaching, practical skill development, and personalised careers support, we challenge and motivate all of our students to unlock their full potential and achieve their goals for the greater good.

Warwick MBA students come to study with us from all over the world because they’re ready for personal and professional transformation. They’re Change Makers who live and breathe our CORE values of Curiosity, Openness, Restlessness, and Excellence.

Taught by some of the world’s leading academics alongside senior business people who join us as Professors of Practice and share their knowledge from years of board-level experience, our students learn from the best. Our transformative research seeks to lead debate and create impact and this underpins our teaching, helping to develop inquisitive and entrepreneurial minds that will make a positive contribution to your organisation.

We are also one of the few institutions to offer an assessed module in Leadership, designed to help our students develop the all-important skills required in today’s challenging business environment.

While many MBA courses offer optional study tours, at WBS we see the international element as an essential experience for personal development. That’s why we include a compulsory week long trip to an overseas partner institution as part of one of our required Full-time MBA modules. Alongside this, we offer our students practical experiences in which they can apply their learning. Your organisation could work with our students on group or individual consultancy projects, or you could employ our students as permanent appointments.

Recruiting our MBAs

There are many ways you can engage with our highly valued MBA students during their time at WBS and beyond.

Student consultancy projects

Student projects are a high-impact opportunity to engage directly with our MBA students.

Group projects – through our LeadershipPlus module, a team of six to eight students will work for a three-month period from January 2020, to analyse your business challenge and provide recommendations.

Individual projects – our students all undertake an individual consultancy project, working alongside an organisation for 10 to 12 weeks over the summer period to provide their insights, analysis and recommendations. We will work with you to define the scope and deliverables of your project and help manage the student selection process.

Recruitment presentations

Why not meet our MBAs face-to-face at either our Warwick campus, or WBS London at The Shard? On-campus presentations are one of the most effective ways to promote your brand, share insights into your organisation, and promote opportunities to WBS students. We organise a peer graduate event to showcase the breadth of organisations employing our alumni, as well as bespoke events throughout the year, and are happy to work around your recruitment plans and deadlines.

Employer treks

On-site visits are a dynamic way to engage with our students. Student visits allow you to showcase your organisation, staff, and culture. In turn, students gain a real insight into a day in the life of your company. Student groups can be tailored to suit your organisation.
